

HANDLER EYES ONLY

Say Again?

FIELD MANUAL — STANDARD EDITION

Print me. Hand me to the Handler. Never show the Agent.

Handler Briefing

You are the **Handler**. Your partner — the **Field Agent** — can see the puzzles on the device, but cannot see this manual. You can see the rules, but not the screen.

1. Ask the Agent what kind of puzzle is on screen, then turn to that puzzle's pages.
2. Ask for details: colors, shapes, letters, numbers, positions.
3. Work the rules out loud and give one clear direction at a time.
4. Have the Agent repeat the direction back before they touch anything.
5. Wrong guesses can fail the module and drag the mission grade down — asking another question never costs a thing.

The app calls easy puzzles Rookie, medium Agent, and hard Mastermind. Some rules only appear on harder missions — those parts are labeled.

TIP Every rule list runs in order from the top — but read its caption first. Lists captioned “apply the first match” stop at the first rule that fits. Checklists and step lists (like elimination checklists or “apply to every gem” rules) work EVERY step, top to bottom, without stopping.

The Static Protocol

Some channels are noisy. When a module shows the STATIC mark  next to its status lamp, run this protocol before acting on the Agent's FIRST description of the puzzle:

1. Do not act yet. Respond only: **“Say again?”**
2. If your teacher set static to 2 or higher, answer the next attempt with: **“What do you mean?”**
3. At static 3, answer once more with: **“I didn’t understand that.”**
4. The Agent must explain it a NEW way each time — repeating the same words does not clear static. Different words, more detail, or a comparison ("it's shaped like a...") all count.
5. After the last request, the channel is clear: proceed with the puzzle as normal.

TIP The static mark shows one dot per required request, and your teacher will tell you the number. Stay neutral — don't hint at what confused you. The Agent has to figure out how to say it better. That is the whole exercise.

PUZZLE 1

Laser Grid Bypass

Practices: Following directions · Describing & directing · Clarifying & repair

The Agent sees a panel of numbered wires. Each wire has a color, a pattern, and a letter tag. Ask the Agent how many wires there are, then work through the matching rule list from top to bottom. Use the FIRST rule that matches — then stop.

plain / solid

striped

dotted / dotty

zigzag

Wire patterns you may hear described.

TIP Wires are numbered from the top. Wire numbers never change, even after a cut. Colors can repeat; letter tags never repeat. Each wire also shows its color name printed on it, so the Agent can read the color out loud instead of judging it by eye.

If there are 4 wires

Check in order; apply the first match.

1. If exactly one wire is striped, cut the striped wire.
2. If there are no crimson wires, cut wire 2 (counting from the top).
3. If the bottom wire is teal, cut the bottom wire.
4. If any wire tag is a vowel (A, E, U), cut the first wire with a vowel tag.
5. If none of the rules above matched, cut wire 3 (counting from the top).

If there are 5 wires

Check in order; apply the first match.

1. If exactly one wire is dotted, cut the dotted wire.

2. If the top wire is zigzag, cut wire 4 (counting from the top).
3. If there are 2 or more violet wires, cut the last violet wire from the top.
4. If no wire tag is a vowel (A, E, U), cut wire 1 (counting from the top).
5. If none of the rules above matched, cut the first wire with a vowel tag.

If there are 6 wires

Check in order; apply the first match.

1. If there is exactly one silver wire, cut the first silver wire from the top.
2. If no wire is solid, cut wire 5 (counting from the top).
3. If the bottom wire is amber, cut wire 2 (counting from the top).
4. If any wire tag is a vowel (A, E, U), cut the first wire with a vowel tag.
5. If none of the rules above matched, cut the bottom wire.

Mastermind missions: the second cut

Six-wire panels on Mastermind missions need TWO cuts. After the first correct cut, use this second list. If the wire it points to is already cut, cut the bottom-most remaining wire instead.

Second cut — check in order; apply the first match.

1. If the wire you already cut was striped, cut the bottom wire.
2. If the wire you already cut was silver, cut wire 1 (counting from the top).
3. If the wire you already cut had a vowel tag, cut wire 3 (counting from the top).
4. If none of the rules above matched, cut wire 4 (counting from the top).

CAREFUL A wrong cut can fail this module and hurt the mission grade. If you are not sure, ask the Agent to describe the wire again before saying "cut".

PUZZLE 2

Crack the Safe

Practices: Describing & directing · Vocabulary & categories · Clarifying & repair

The Agent sees a row of gems mounted above a 0–9 keypad. Each gem has a SHAPE (teardrop, star, hexagon, ring, or wedge), a MARKING (no marking, a band across the middle, or a core dot in the center), and a SIZE (small or large — a printed S or L tag sits under every gem, so size is never a guess). Ask the Agent to describe the gems left to right, one at a time: shape, marking, then size tag. Turn each gem into a digit with the steps below, then read the whole code back so the Agent can key it in and press ENTER.

	No marking	Band	Core dot
teardrop			
star			
hexagon			
ring			
wedge			

Gem glossary: every shape with each of the three markings.

Size legend: every gem carries a printed S (small) or L (large) tag beneath it.

TIP Vague descriptions crack no safes. If the Agent says "the pointy one," ask a clarifying question: "Pointy at the top or the bottom? Does it have a band, a dot, or no marking? What is its size tag?"

Step 1 — Look up each gem's base digit

Base digit: find the shape row, then the marking column.

Shape	No marking	Band	Core dot
Teardrop	0	5	8
Star	1	6	9
Hexagon	2	7	0
Ring	3	8	1
Wedge	4	9	2

Step 2 — Apply the size rule to each gem

Apply to every gem.

1. If a gem is LARGE (tag L), add 2 to its digit. There is no digit above 9, so wrap around: 8 becomes 0, 9 becomes 1. Small gems (tag S) keep their table digit.

Step 3 — The twist (4-gem vaults only)

This step only applies when the vault shows 4 or more gems. After you have every digit, check this list in order and apply the first rule that matches.

Check in order; apply the first match.

1. If two or more gems have the SAME shape, reverse the whole code before reading it out (last digit becomes first).
2. If none of the rules above matched, read the code exactly as computed.
1. Ask: "How many gems do you see?"
2. For each gem, left to right: get its shape, its marking, and its printed size tag.
3. Compute each digit with Steps 1 and 2. Jot them down in order.
4. If there are 4 or more gems, run Step 3 on the whole code.
5. Read the final code aloud, digit by digit. The Agent keys it in, reads it back, then presses ENTER.

CAREFUL A wrong ENTER raises the alarm level and clears the keypad. Before ENTER, have the Agent read the entered digits back to you and confirm they match.

PUZZLE 3

Code Room

Practices: Vocabulary & categories · Describing & directing · Clarifying & repair

The Agent sees a keypad of word keys — one everyday English word printed on each key, in no special order. Every word belongs to exactly one of the eight category tables below. Ask the Agent to read every word aloud, find each word's table, then direct the presses: highest-ranked table first. When a key locks in, a numbered badge and a check mark appear on it.

Do this for every word on the keypad before pressing anything.

1. Ask the Agent to read every word on the keypad out loud.
2. For each word, find the one table that lists it and note that table's rank.
3. Using the press-order rules, tell the Agent which key to press, one at a time.
4. Confirm each word back to the Agent before saying "press".

Press order — check ranks from the top.

1. Rank 1 — Animals: keys with a word from the Animals table are pressed before everything below.
2. Rank 2 — Tools: keys with a word from the Tools table are pressed only after every table above is done.
3. Rank 3 — Food: keys with a word from the Food table are pressed only after every table above is done.
4. Rank 4 — Clothing: keys with a word from the Clothing table are pressed only after every table above is done.
5. Rank 5 — Vehicles: keys with a word from the Vehicles table are pressed only after every table above is done.
6. Rank 6 — Weather: keys with a word from the Weather table are pressed only after every table above is done.

7. Rank 7 — School supplies: keys with a word from the School supplies table are pressed only after every table above is done.
8. Rank 8 — Feelings: keys with a word from the Feelings table are pressed only after every table above is done.
9. If two keys hold words from the same table, press them in alphabetical order (A before Z).

TIP If a word could fit two lists, only one table actually contains it — ask the Agent to spell it if unsure.

Category tables

Table 1 — Animals

Animals words (A to Z)
badger · camel · dolphin · ferret
gecko · heron · koala · moose
ocelot · otter · panda · raccoon
stallion

Table 2 — Tools

Tools words (A to Z)
awl · clamp · crowbar · drill
hammer · lathe · mallet · pliers
saw · screwdriver · shovel · trowel
wrench

Table 3 — Food

Food words (A to Z)
bagel · burrito · carrot · falafel
gnocchi · mango · noodles · oatmeal
pancake · pretzel · quiche · taco
yogurt

Table 4 — Clothing

Clothing words (A to Z)
apron · beret · boots · cardigan
gloves · hoodie · jacket · jeans
mittens · poncho · sandals · scarf
sweater

Table 5 — Vehicles

Vehicles words (A to Z)
bus · canoe · ferry · gondola
helicopter · kayak · rickshaw · scooter
subway · tractor · truck · van
zeppelin

Table 6 — Weather

Weather words (A to Z)
blizzard · breeze · drizzle · fog
gale · hail · humidity · lightning
monsoon · rainbow · sleet · sunshine
thunder

Table 7 — School supplies

School supplies words (A to Z)
backpack · binder · compass · crayon
eraser · glue · highlighter · marker
notebook · pencil · protractor · ruler
stencil

Table 8 — Feelings

Feelings words (A to Z)
angry · anxious · bored · calm
cheerful · envious · excited · grumpy
jealous · nervous · proud · reluctant
silly

CAREFUL A wrong press resets the keypad: every locked key unlocks and the sequence starts over from zero. The words never change, so slow down and re-check the tables.

PUZZLE 4

Password Intercept

Practices: Vocabulary & categories · Following directions · Clarifying & repair

An enemy transmission is coming in. The Agent's screen shows an intercept card number (for example, "CARD 17") and a bank of five candidate words — but no clues. Only this manual holds the card table. Ask the Agent for the card number, look it up below, and read the clue with its relation aloud. The Agent then picks the one candidate word that fits. Each transmission has several cards to decode, one at a time.

synonym of (=)

a word with the same meaning as the clue

opposite of (≠)

a word with the reverse meaning of the clue

means (▶)

the clue is the definition of the word

Relation symbols used in the card table.

1. Ask the Agent: "What card number do you see?"
2. Repeat the number back and wait for a "confirmed" before you look it up.
3. Find that row in the card table and read the relation and clue aloud — for example: "Card 15: the opposite of "ancient"."
4. Have the Agent read all five candidate words before choosing.
5. Agree on the one word that fits, then the Agent taps it.

TIP Confirm the card number out loud before decoding — "Card seventeen, one-seven, confirm?" A misheard number sends you to the wrong clue. If a clue seems to fit nothing, re-confirm the number and ask the Agent to reread the candidate words.

Intercept cards 1–10

Card	Relation	Clue
1	synonym of (=)	fast
2	synonym of (=)	happy
3	synonym of (=)	big
4	opposite of (≠)	cold
5	opposite of (≠)	day
6	opposite of (≠)	open
7	synonym of (=)	begin
8	means (►)	a place where you borrow books
9	means (►)	frozen water
10	means (►)	the meal you eat in the morning

Intercept cards 11–20

Card	Relation	Clue
11	opposite of (≠)	loud
12	synonym of (=)	small
13	synonym of (=)	shout
14	opposite of (≠)	empty
15	opposite of (≠)	ancient
16	synonym of (=)	brave
17	opposite of (≠)	rare
18	means (►)	a person who fixes teeth
19	synonym of (=)	error
20	opposite of (≠)	expand

Intercept cards 21–30

Card	Relation	Clue
21	means (►)	to say you are sorry
22	synonym of (=)	fragile
23	synonym of (=)	vacant
24	opposite of (≠)	ally
25	means (►)	a drawing of a place that shows streets and borders
26	synonym of (=)	seldom
27	opposite of (≠)	genuine
28	synonym of (=)	reluctant
29	opposite of (≠)	abundant
30	synonym of (=)	candid

Intercept cards 31–40

Card	Relation	Clue
31	means (►)	to make something less severe or easier to bear
32	synonym of (=)	diligent
33	opposite of (≠)	novice
34	synonym of (=)	obsolete
35	synonym of (=)	prosper
36	opposite of (≠)	timid
37	means (►)	lasting for only a short time
38	opposite of (≠)	transparent
39	synonym of (=)	meticulous
40	opposite of (≠)	hostile

CAREFUL A wrong word raises the alarm level, but the round can be retried. Watch for trap words: on an "opposite of" card, a word that means the SAME as the clue is always wrong.

PUZZLE 5

Alarm Bypass

Practices: Following directions · Describing & directing

The Agent sees a wall panel with four signal buttons — each has a shape and a printed letter: Crescent (C), Key (K), Bolt (B), Eye (E). The panel flashes a short signal (a sequence of shapes), and the Agent can replay it as many times as needed. First ask the Agent for the MODEL CODE printed on the panel and the current ROUND number. Then have the Agent read out the flashed shapes in order. Translate each one using that round's SEE → PRESS table below, and tell the Agent which buttons to press, in order.

Crescent (C)

Key (K)

Bolt (B)

Eye (E)

The four signal glyphs and their printed letters. Go by shape and letter, never by color.

TIP Have the Agent read the whole signal first, then translate one at a time. If a shape description is unclear, ask for the printed letter.

1. Ask: "What model code is printed on the panel?" (RK-2, AG-3, or MM-3)
2. Ask: "What round are you on?"
3. Have the Agent replay the signal and read every flashed shape in order.
4. Find that model and round's table below. Translate each flashed shape: SEE → PRESS.
5. Tell the Agent the buttons to press, in order. Then move to the next round.

Panel model RK-2 (2 rounds)

Model RK-2 — Round 1 (signal has 2 flashes): SEE → PRESS

SEE (flashed)	PRESS
Crescent (C)	Crescent (C)
Key (K)	Key (K)
Bolt (B)	Eye (E)
Eye (E)	Bolt (B)

Model RK-2 — Round 2 (signal has 3 flashes): SEE → PRESS

SEE (flashed)	PRESS
Crescent (C)	Key (K)
Key (K)	Crescent (C)
Bolt (B)	Bolt (B)
Eye (E)	Eye (E)

Panel model AG-3 (3 rounds)

Model AG-3 — Round 1 (signal has 2 flashes): SEE → PRESS

SEE (flashed)	PRESS
Crescent (C)	Key (K)
Key (K)	Bolt (B)
Bolt (B)	Crescent (C)
Eye (E)	Eye (E)

Model AG-3 — Round 2 (signal has 3 flashes): SEE → PRESS

SEE (flashed)	PRESS
Crescent (C)	Crescent (C)
Key (K)	Eye (E)
Bolt (B)	Key (K)
Eye (E)	Bolt (B)

Model AG-3 — Round 3 (signal has 4 flashes): SEE → PRESS

SEE (flashed)	PRESS
Crescent (C)	Eye (E)
Key (K)	Crescent (C)
Bolt (B)	Key (K)
Eye (E)	Bolt (B)

Panel model MM-3 (3 rounds)

Model MM-3 — Round 1 (signal has 3 flashes): SEE → PRESS

SEE (flashed)	PRESS
Crescent (C)	Bolt (B)
Key (K)	Eye (E)
Bolt (B)	Crescent (C)
Eye (E)	Key (K)

Model MM-3 — Round 2 (signal has 4 flashes): SEE → PRESS

SEE (flashed)	PRESS
Crescent (C)	Key (K)
Key (K)	Bolt (B)
Bolt (B)	Eye (E)
Eye (E)	Crescent (C)

Model MM-3 — Round 3 (signal has 5 flashes): SEE → PRESS

SEE (flashed)	PRESS
Crescent (C)	Eye (E)
Key (K)	Bolt (B)
Bolt (B)	Key (K)
Eye (E)	Crescent (C)

CAREFUL A wrong press raises the alarm level and clears only that round's presses — the flashed signal stays the same. Replay it, double-check the round number, and try again.

PUZZLE 6

Escape Route

Practices: Describing & directing · Following directions · Clarifying & repair

The Agent sees a top-down floor map with their avatar at START, an EXIT, walls, and landmark icons — but the floor sensors are invisible on screen. Only YOUR maps show the sensors and the safe route. Ask for the floor code, find that map below, and talk the Agent through cell by cell. The Agent moves with north/south/east/west buttons and can read cell coordinates (letters across the top, numbers down the side).

Compass: north is always the top of the map. Row 1 is the north row; column A is the west column.

How the floor works

1. First, ask the Agent for the floor code on their screen (for example "FLOOR K-3"), then turn to that floor's map in this manual.
2. The Agent begins on the cell marked START — the filled dot on your map.
3. Each command moves the Agent exactly one cell north, south, east, or west. North is the top of the map.
4. Thick lines are walls. The Agent cannot move through a wall — and the Agent CAN see the walls on screen.

5. Hatched squares are floor sensors. They are INVISIBLE on the Agent's screen — only your map shows them.
6. If the Agent steps on a sensor, the alarm level rises and the Agent is sent back to START. Nothing is lost — guide them again.
7. The mission is complete the moment the Agent reaches the cell marked EXIT.
8. The dashed line is the recommended route, but ANY path that avoids walls and sensors works.

desk — letter D, square shape

plant — letter P, triangle shape

camera — letter C, circle shape

crate — letter K, diamond shape

fountain — letter F, hexagon shape

hidden sensor (Agent cannot see it)

wall (blocks movement; Agent sees it)

safe route (manual only)

START

EXIT

Map legend: every landmark has a shape AND a letter tag, so you never have to rely on color.

Landmark tags the Agent can read out.

Landmark	Letter tag	Shape
desk	D	square
plant	P	triangle
camera	C	circle
crate	K	diamond
fountain	F	hexagon

TIP Use landmarks as checkpoints. At each one, pause and ask: "What do you see? Which cell are you in?" If two landmarks match (some floors have two plants, two cameras...), ask for the cell coordinate to tell them apart.

CAREFUL A sensor step raises the alarm and sends the Agent back to START. Before saying "go", double-check the next cell on your map — and if the Agent sounds unsure about where they are, ask them to read their coordinates again.

Rookie floors (4×4 grid): K-1, K-2, K-3, K-4

Floor K-1 — dashed line is the safe route; hatched squares are hidden sensors.

From START at A4: north 2 to A2; east 2 to the desk (tag D) at C2; north 1 to C1; east 1 to D1. That last cell, D1, is the EXIT.

Floor K-2 — dashed line is the safe route; hatched squares are hidden sensors.

From START at D4: west 2 to B4; north 2 to B2; west 1 to A2; north 1 to A1. That last cell, A1, is the EXIT.

Floor K-3 — dashed line is the safe route; hatched squares are hidden sensors.

From START at A1: south 2 to A3; east 2 to C3; south 1 to the plant (tag P) at C4; east 1 to D4. That last cell, D4, is the EXIT.

Floor K-4 — dashed line is the safe route; hatched squares are hidden sensors.

From START at B4: west 1 to A4; north 3 to A1; east 2 to C1. That last cell, C1, is the EXIT.

Agent floors (5×5 grid): M-1, M-2, M-3, M-4

Floor M-1 — dashed line is the safe route; hatched squares are hidden sensors.

From START at A5: north 1 to A4; east 1 to the plant (tag P) at B4; north 2 to B2; east 2 to D2; north 1 to D1; east 1 to E1. That last cell, E1, is the EXIT.

Floor M-2 — dashed line is the safe route; hatched squares are hidden sensors.

From START at E5: west 1 to D5; north 1 to the crate (tag K) at D4; west 2 to B4; north 3 to B1; west 1 to A1. That last cell, A1, is the EXIT.

Floor M-3 — dashed line is the safe route; hatched squares are hidden sensors.

From START at C5: west 1 to B5; north 2 to B3; west 1 to the plant (tag P) at A3; north 2 to A1; east 2 to C1. That last cell, C1, is the EXIT.

Floor M-4 — dashed line is the safe route; hatched squares are hidden sensors.

From START at A1: east 2 to C1; south 2 to C3; east 1 to D3; south 2 to D5; east 1 to E5. That last cell, E5, is the EXIT.

Mastermind floors (6×6 grid): X-1, X-2, X-3, X-4

Floor X-1 — dashed line is the safe route; hatched squares are hidden sensors.

From START at A6: north 1 to A5; east 2 to C5; north 2 to the desk (tag D) at C3; west 1 to B3; north 2 to B1; east 4 to F1. That last cell, F1, is the EXIT.

Floor X-2 — dashed line is the safe route; hatched squares are hidden sensors.

From START at F6: north 1 to F5; west 1 to E5; north 2 to E3; west 1 to D3; south 1 to the desk (tag D) at D4; west 1 to C4; north 2 to the fountain (tag F) at C2; west 2 to A2; north 1 to A1. That last cell, A1, is the EXIT.

Floor X-3 — dashed line is the safe route; hatched squares are hidden sensors.

From START at C6: north 1 to C5; east 2 to E5; north 2 to E3; west 1 to D3; north 2 to the desk (tag D) at D1; east 2 to F1; south 1 to F2. That last cell, F2, is the EXIT.

Floor X-4 — dashed line is the safe route; hatched squares are hidden sensors.

From START at F1: south 2 to F3; west 2 to D3; south 2 to D5; west 1 to the camera (tag C) at C5; north 1 to C4; west 1 to B4; south 2 to B6; west 1 to A6. That last cell, A6, is the EXIT.

PUZZLE 7

Spot the Contact

Practices: Describing & directing · Vocabulary & categories · Clarifying & repair

The Agent sees a lineup of numbered suspect portraits — exactly one is your secret contact. Every portrait shows five features: headwear, glasses, hair, accessory, and shirt pattern. First ask, "How many suspects are in the lineup?" — the count tells you which checklist to use. Have the Agent describe the suspects, cross people out on scrap paper as the checklist directs, and the last suspect standing is the contact. Tell the Agent which number to tap, then confirm.

Headwear

no headwear

beanie

cap

Glasses

no glasses

round glasses

square glasses

Hair

short hair

long hair

curly hair

Accessory

no accessory

scarf

star badge

bow tie

Shirt pattern

plain shirt

striped shirt

spotted shirt

Feature glossary: every look the Agent might describe, with the exact name to use.

1. Ask how many suspects are in the lineup, then find the matching checklist below.

2. Ask the Agent to describe each suspect by number: headwear, glasses, hair, accessory, shirt.
3. Work the checklist in order, crossing out suspects on paper. The screen never changes and positions never renumber.
4. Exactly one suspect will be left. Tell the Agent: "Tap suspect N, then press Confirm Contact."

TIP Narrowing questions save time: "Does anyone wear glasses?" or "Who has curly hair?" can cross out several suspects at once. If a description is unclear, ask the Agent to say it another way — clarifying is part of the job.

Rookie checklist — 4 suspects

Work the steps strictly in order, top to bottom.

1. Cross out anyone wearing a cap.
2. Cross out anyone wearing a scarf.
3. Cross out anyone in a striped shirt.

Agent checklist — 5 suspects

Work the steps strictly in order, top to bottom.

1. Cross out anyone wearing any headwear (a beanie or a cap) AND wearing glasses of any shape.
2. Cross out anyone with curly hair.
3. Cross out anyone in a spotted shirt.
4. Cross out anyone wearing a star badge.

Mastermind checklist — 6 suspects

Work the steps strictly in order, top to bottom.

1. Cross out anyone wearing a beanie AND wearing glasses of any shape.
2. Cross out anyone with long hair.
3. Cross out anyone wearing a bow tie.
4. If two or more suspects remain, check the shirt printed on suspect 1's portrait (even if suspect 1 is crossed out) and cross out every OTHER suspect with that same shirt pattern.
5. Cross out anyone wearing square glasses.

CAREFUL Confirming the wrong suspect raises the alarm level. Before you say "confirm", double-check the last suspect standing against every step you crossed out.

PUZZLE 8

Debrief Tapes

Practices: Storytelling & sequencing · Describing & directing · Clarifying & repair

The Agent sees numbered surveillance stills from a finished operation — but the tape got shuffled. Each still shows the operative somewhere, and most carry a corner marker. Ask the Agent to describe every still (its letter, who, where, and the corner marker). Use the marker table to identify each entry, then dictate the report order. Letters on the stills are NAMES for talking about them — they say nothing about order.

alert bolt

thought bubble

motion arrows

crack

case seal

The opening still has NO corner marker.

The corner markers you may hear described.

Identify each still by its corner marker.

Corner marker	Report entry
No corner marker at all — just the operative in a place. This is where the operation begins.	THE OPENING — who and where
A jagged alert bolt in the corner — something unexpected has just happened.	THE INCIDENT — what went wrong
A thought bubble in the corner — the operative is deciding what to do about it.	THE PLAN — what they decided to do
Double motion arrows in the corner — the operative is carrying out the plan.	THE ATTEMPT — what they did
A crack symbol in the corner — the plan has hit trouble mid-attempt.	THE COMPLICATION — the trouble on the way
A round case seal in the corner — the operation is over. A check inside means it worked; a dash means it did not.	THE OUTCOME — how it ended

The report template — entries always go in this order (skip entries the tape does not have).

Tape size	Report order
Rookie — 4 stills	THE OPENING → THE INCIDENT → THE ATTEMPT → THE OUTCOME
Agent — 5 stills	THE OPENING → THE INCIDENT → THE PLAN → THE ATTEMPT → THE OUTCOME
Mastermind — 6 stills	THE OPENING → THE INCIDENT → THE PLAN → THE ATTEMPT → THE COMPLICATION → THE OUTCOME

Linking the entries (Agent and Mastermind tapes)

After the order is locked, the tape asks for the word that joins each pair of entries: THEN (it simply comes next), SO (it happens because of the one before), or BUT (it gets in the way).

Linking words (Agent and Mastermind tapes): find the pair of entries, use its word.

1. Opening → Incident: the incident simply comes next. Link with THEN.
2. Incident → Plan: the plan happens BECAUSE of the incident. Link with SO.
3. Incident → Attempt (no plan card): the action happens BECAUSE of the incident. Link with SO.
4. Plan → Attempt: the attempt simply carries the plan out next. Link with THEN.
5. Attempt → Complication: the trouble gets in the way. Link with BUT.
6. Complication → Outcome: the ending happens BECAUSE of the trouble. Link with SO.
7. Attempt → Outcome (no complication card): the ending happens BECAUSE of the attempt. Link with SO.

Record the debrief

1. When the order (and links) are locked, the Agent retells the WHOLE operation aloud, start to finish, using the linking words.
2. Listen for every entry: who and where, what went wrong, the plan, what they did, and how it ended.
3. Something missing or out of order? Ask the Agent to rewind and tell that part again.
4. Satisfied? The Agent presses “Tape recorded”.

CAREFUL Locking a still into the wrong report position counts as a wrong answer. If you are unsure which entry a still is, ask about its corner marker again before you dictate.

PUZZLE 9

Bad Intel

Practices: Clarifying & repair · Following directions · Describing & directing

The Agent sees a maintenance panel: a model name printed across the top and a rack of hardware controls — dials, toggles, levers, valves — each stamped with a big tag letter and a setting number. You hold the service sequence for every model. Find the panel’s model below and read its steps aloud IN ORDER, one at a time; for each step the Agent finds the one control that matches and taps it. One warning before you start: these sequences were printed before the op.

dial

toggle

lever

valve

Every control also shows a big tag letter and a setting number.

The four control types you may hear described.

The four kinds of hardware, as the Agent will describe them.

Control	How to spot it
Dial	A round gauge with tick marks and a needle pointing at its setting.
Toggle	A stubby switch in a vertical slot, sitting either up or down.
Lever	A long handle with a ball grip, mounted on a base plate.
Valve	A spoked wheel you would turn, like the wheel on a pipe.

Tag letters: a VOWEL is A, E, I, O, or U; every other letter is a CONSONANT. Steps name hardware by control type plus tag letter — the setting number is just how the Agent describes a control, it never decides a step.

Rookie panels (3 steps)

CAREFUL Rookie panels always drift: exactly one step in the sequence will be bad

intel. It is never the same one twice — make the Agent prove each step before anyone taps.

SERVICE MODEL A — Rookie (3 steps)

Step	Instruction
1	Service the dial tagged with a vowel (A, E, I, O, or U).
2	Service the toggle tagged with a consonant (any letter that is not A, E, I, O, or U).
3	Service the valve tagged with a vowel (A, E, I, O, or U).

SERVICE MODEL B — Rookie (3 steps)

Step	Instruction
1	Service the toggle tagged with a vowel (A, E, I, O, or U).
2	Service the dial tagged with a consonant (any letter that is not A, E, I, O, or U).
3	Service the lever tagged with a vowel (A, E, I, O, or U).

Agent panels (4 steps)

TIP Panels at this tier drift too. A step the panel cannot satisfy must be flagged — never forced.

SERVICE MODEL C — Agent (4 steps)

Step	Instruction
1	Service the dial tagged with a consonant (any letter that is not A, E, I, O, or U).
2	Service the valve tagged with a vowel (A, E, I, O, or U).
3	Service the toggle tagged with a consonant (any letter that is not A, E, I, O, or U).
4	Service the lever tagged with a consonant (any letter that is not A, E, I, O, or U).

SERVICE MODEL D — Agent (4 steps)

Step	Instruction
1	Service the valve tagged with a consonant (any letter that is not A, E, I, O, or U).
2	Service the dial tagged with a vowel (A, E, I, O, or U).
3	Service the lever tagged with a vowel (A, E, I, O, or U).
4	Service the toggle tagged with a vowel (A, E, I, O, or U).

Mastermind panels (5 steps)

SERVICE MODEL E — Mastermind (5 steps)

Step	Instruction
1	Service the toggle tagged with a consonant (any letter that is not A, E, I, O, or U).
2	Service the dial tagged with a vowel (A, E, I, O, or U).
3	Service the valve tagged with a consonant (any letter that is not A, E, I, O, or U).
4	Service the lever tagged with a vowel (A, E, I, O, or U).
5	Service the dial tagged with a consonant (any letter that is not A, E, I, O, or U).

SERVICE MODEL F — Mastermind (5 steps)

Step	Instruction
1	Service the lever tagged with a consonant (any letter that is not A, E, I, O, or U).
2	Service the valve tagged with a vowel (A, E, I, O, or U).
3	Service the toggle tagged with a vowel (A, E, I, O, or U).
4	Service the dial tagged with a consonant (any letter that is not A, E, I, O, or U).
5	Service the valve tagged with a consonant (any letter that is not A, E, I, O, or U).

The bad intel exception

CAREFUL These sequences were printed before the op — panels drift in the field. If a step names hardware this panel simply does not have (no control of that type carries that kind

of tag letter), the step is BAD INTEL. The Agent presses FLAG BAD INTEL and the pair skips to the next step. Tapping any control on a bad step is a wrong answer — and so is flagging a step the panel can actually satisfy.

Working a step

1. Ask for the model name, then read the current step aloud exactly as printed.
2. Ask: “What do you see that matches?” Have the Agent name the control — its type, its tag letter, its setting — before anything gets tapped.
3. Exactly one control matches? The Agent taps it, and you read the next step.
4. The Agent says nothing matches? Do not agree to flag yet. Ask: “What’s missing?” — have them list every control of that type, then every control with that kind of tag letter.
5. Still nothing that fits both? The step is bad intel. The Agent presses FLAG BAD INTEL and you both skip to the next step.

TIP A wrong tap and a wrong flag both count as wrong answers, and the panel stays exactly as it was. Talking it through first costs nothing.

PUZZLE 10

Asset Interview

Practices: Clarifying & repair · Describing & directing · Following directions

The Agent sees a WITNESS STATEMENT: an interview form letter and five observed facts — time of day, place, what the person was carrying, company, and whether a chalk mark was seen. You hold the question flows; the Agent cannot see them. Ask for the FORM LETTER first, then walk that form's numbered flow from step 1, asking one question at a time, until it ends in a verdict. Dictate the verdict and the Agent commits it on screen.

Time of day

Place

Carrying

Company

Chalk mark seen

The statement icons, row by row — everything the Agent may report seeing.

TIP Ask ONE question at a time, and have the Agent answer only the question you asked. Getting exactly the information you need — no more, no less — is the whole exercise.

The verdicts

The six verdicts. Dictate the verdict word for word — the Agent commits it from six buttons.

Verdict	Button badge	Dossier note
GENUINE CONTACT	the star badge	The real rendezvous. Proceed with the exchange.
DOUBLE AGENT	the split diamond	Working both sides of the street. Break contact and report in.
COURIER FOR THE OTHER SIDE	the envelope	Carrying the other side's messages. Do not engage.
INNOCENT BYSTANDER	the open ring	A passer-by with no part in this. No action needed.
TALENT SCOUT	the flag	Recruiting new eyes for a rival network. Note the face and keep moving.
STREET WATCHER	the eye	Paid to watch the block and report movement. Vary your route.

The question flows

Find the form the Agent reads off the statement stamp. Start at step 1. Every answer sends you to another step or ends in a verdict. The facts the flow never asks about do not matter — do not let them distract you.

FORM A — Rookie (at most 2 questions)

1. Ask: was a chalk mark seen nearby? If YES, go to step 2. If NO, go to step 3.
2. Ask: were they alone or with a companion? If ALONE, verdict: GENUINE CONTACT. If WITH A COMPANION, verdict: DOUBLE AGENT.

3. Ask: what were they carrying? If A CASE, verdict: COURIER FOR THE OTHER SIDE. If A NEWSPAPER, verdict: STREET WATCHER. If FLOWERS, verdict: TALENT SCOUT. If NOTHING, verdict: INNOCENT BYSTANDER.

FORM B — Rookie (at most 2 questions)

1. Ask: where did the meeting happen? If THE BRIDGE or THE TRAM STOP, go to step 2. If THE CAFE or THE KIOSK, go to step 3.
2. Ask: what time of day was it? If NIGHT, verdict: STREET WATCHER. If DAWN, verdict: COURIER FOR THE OTHER SIDE. If NOON or DUSK, verdict: INNOCENT BYSTANDER.
3. Ask: was a chalk mark seen nearby? If YES, verdict: GENUINE CONTACT. If NO, verdict: TALENT SCOUT.

FORM C — Agent (at most 3 questions)

1. Ask: what time of day was it? If NIGHT, go to step 2. If DAWN or DUSK, go to step 3. If NOON, verdict: INNOCENT BYSTANDER.
2. Ask: was a chalk mark seen nearby? If YES, go to step 4. If NO, verdict: STREET WATCHER.
3. Ask: what were they carrying? If FLOWERS, verdict: TALENT SCOUT. If A CASE, go to step 5. If A NEWSPAPER or NOTHING, verdict: INNOCENT BYSTANDER.
4. Ask: were they alone or with a companion? If ALONE, verdict: GENUINE CONTACT. If WITH A COMPANION, verdict: DOUBLE AGENT.
5. Ask: where did the meeting happen? If THE BRIDGE, verdict: COURIER FOR THE OTHER SIDE. If THE TRAM STOP or THE CAFE or THE KIOSK, verdict: STREET WATCHER.

FORM D — Agent (at most 3 questions)

1. Ask: what were they carrying? If A CASE, go to step 2. If A NEWSPAPER, go to step 3. If FLOWERS, verdict: TALENT SCOUT. If NOTHING, go to step 4.
2. Ask: was a chalk mark seen nearby? If YES, go to step 5. If NO, verdict: COURIER FOR THE OTHER SIDE.
3. Ask: what time of day was it? If NOON, verdict: INNOCENT BYSTANDER. If DUSK or NIGHT, verdict: STREET WATCHER. If DAWN, verdict: COURIER FOR THE OTHER SIDE.

4. Ask: were they alone or with a companion? If ALONE, verdict: INNOCENT BYSTANDER. If WITH A COMPANION, go to step 6.
5. Ask: where did the meeting happen? If THE KIOSK, verdict: GENUINE CONTACT. If THE TRAM STOP or THE CAFE or THE BRIDGE, verdict: DOUBLE AGENT.
6. Ask: was a chalk mark seen nearby? If YES, verdict: DOUBLE AGENT. If NO, verdict: INNOCENT BYSTANDER.

FORM E — Mastermind (at most 4 questions)

1. Ask: where did the meeting happen? If THE BRIDGE, go to step 2. If THE TRAM STOP, go to step 3. If THE CAFE or THE KIOSK, go to step 4.
2. Ask: what time of day was it? If NIGHT, go to step 5. If DAWN or NOON or DUSK, go to step 6.
3. Ask: what were they carrying? If A CASE, go to step 5. If A NEWSPAPER, verdict: STREET WATCHER. If FLOWERS or NOTHING, go to step 7.
4. Ask: was a chalk mark seen nearby? If YES, go to step 7. If NO, verdict: INNOCENT BYSTANDER.
5. Ask: were they alone or with a companion? If ALONE, go to step 8. If WITH A COMPANION, verdict: DOUBLE AGENT.
6. Ask: was a chalk mark seen nearby? If YES, verdict: COURIER FOR THE OTHER SIDE. If NO, verdict: INNOCENT BYSTANDER.
7. Ask: were they alone or with a companion? If WITH A COMPANION, verdict: TALENT SCOUT. If ALONE, verdict: STREET WATCHER.
8. Ask: was a chalk mark seen nearby? If YES, verdict: GENUINE CONTACT. If NO, verdict: COURIER FOR THE OTHER SIDE.

FORM F — Mastermind (at most 4 questions)

1. Ask: what time of day was it? If DUSK or NIGHT, go to step 2. If DAWN, go to step 3. If NOON, go to step 4.
2. Ask: what were they carrying? If A CASE, go to step 5. If FLOWERS, go to step 6. If A NEWSPAPER or NOTHING, go to step 4.
3. Ask: were they alone or with a companion? If ALONE, go to step 7. If WITH A COMPANION, verdict: TALENT SCOUT.

4. Ask: was a chalk mark seen nearby? If YES, go to step 6. If NO, verdict: INNOCENT BYSTANDER.
5. Ask: was a chalk mark seen nearby? If YES, go to step 8. If NO, verdict: COURIER FOR THE OTHER SIDE.
6. Ask: were they alone or with a companion? If WITH A COMPANION, verdict: DOUBLE AGENT. If ALONE, verdict: STREET WATCHER.
7. Ask: what were they carrying? If A NEWSPAPER, verdict: STREET WATCHER. If NOTHING, verdict: INNOCENT BYSTANDER. If A CASE or FLOWERS, go to step 8.
8. Ask: where did the meeting happen? If THE KIOSK or THE CAFE, verdict: GENUINE CONTACT. If THE BRIDGE, verdict: DOUBLE AGENT. If THE TRAM STOP, verdict: COURIER FOR THE OTHER SIDE.

CAREFUL A wrong verdict raises the alarm, but the statement does not change. The fix is to re-walk the same flow OUT LOUD from step 1 — read each question, hear the Agent's answer, and say which step it sends you to — until you both hear where it leads.
